FOR IMMEDIATE RELEASE

DigiLore Awarded Another Air Force Grant

Cincinnati, Ohio 10/2/2006 DigiLore Inc. received a Small Business Innovation Research (SBIR) grant from the U.S. Air Force. The grant will be used to further research and deliver a solution for embedded learning, and will focus on advising aircraft maintenance workers.

“DigiLore is proud to continue our partnership with the U.S. Air Force in providing solutions to assist the men and women protecting our country”, said Joe Russo, President and CEO of DigiLore, “Having the ability to use computer assisted intelligence to quickly diagnose mechanical and electrical failures, as well as, recommend best practices for repairs with reference aids to reduce equipment downtime will save the Air Force both time and money.

The DigiLore Intelligent Diagnostic Center ® is another key product in the Learning Lifecycle Management ® process and will compliment the other products offered by DigiLore to assist organizations with learning.

About DigiLore

DigiLore is the only choice for Learning Lifecycle Management ®. The Learning Lifecycle Management ® product suite enables the organizations to plan, manage and control the learning process from start to finish, including the ability to ascertain the effectiveness of training programs. The suite is Learning Management System (LMS) and authoring tool independent and has been brought to market through a well established partnership with the Department of Defense.

Founded in 1999, DigiLore is a privately held company with offices in Cincinnati, Hawaii, and Dubai.
